

Week 4 Term 4

What a super sunny and amazing week!

Our learning this week has taken us to new places. We have built on skills already held and had so much fun!

We have taken part in many different activities and workshops this week.

The classes have also shared stories, adventures and birthday cake!

We look forward to learning new things next week.

We have been busy in Science exploring Melting and Freezing, testing the efficacy of isothermal bags as well as testing the strength of our legs. We have taken part in Music workshops, Capoeira and took our learning outside into the forest.
